

## Career Opportunity

Send resume to HR1@iisfirst.com

### Software QA Analyst

IIS is searching for a Software Quality Assurance Analyst who has 3-4 years of experience in QA & Testing.

The ideal candidate should have a thorough understanding of the Software Testing Life Cycle and should be able to perform both QA and QC activities. The candidate should have 1-2 years of experience in test automation, with IBM Rational Robot. Familiarity with SQL and experience in writing queries will be an added advantage. The candidate should show a willingness to learn and work on IIS' QA methodology and Testing Processes.

#### Essential Skills & Responsibilities:

- Create and document test plans, test scenarios, and test reports
- Create and maintain the test environment, including test data
- Test releases using manual and automated methods
- Track and help prioritize defects
- Create data-driven automated test scripts
- Assist and help to improve QA and Testing processes
- Analyze production defects to improve test coverage
- Ensure less defects are discovered in production.

Candidates should be self-directed and possess strong leadership, communication, and interpersonal skills with proven effectiveness in both client and internal team interactions. An entrepreneurial spirit, a passion for delivering high quality products, and a genuine commitment to our "Living Company" philosophy and flat management structure are essential.
