SQL “Back End” Developer

IIS is seeking experienced developers for migration/implementation of an enterprise-class application system. This position works primarily in the area of “Back-End” development. Developers are needed with the following technical qualifications:

- Strong SQL and relational database skills.
- A desire to do very challenging back-end programming.
- 0 to 6 years in developing and testing Windows applications using Microsoft .NET, Visual Studio 2003/2005, C#, SQL and relational database systems (preferably SQL Server).
- Experience in test driven development is desired.
- Exceptional testing and debugging skills. (QA/QC experience is preferred).
- Computer Science Graduate or 4 yr degree with Computing Certificate with a GPA of 3.0 or above preferred

This project is being executed using the Agile SCRUM methodology. To maintain the effectiveness of the team, technically qualified applicants should also have the following teaming and people relationship skills:

- Good communication skills, primarily for presenting ideas within the project team or within the company.
- Excellent teamwork skills, recognizing that the success of the team is more important than the success of the individual. The successful applicant will demonstrate a personal commitment to the success of the project.
- Willingness to mentor / train other team members in technology as required.
- Ability to build and maintain trust-based relationships with others at all levels of the organization and with customer staff as required.
- Willingness to work one on one with customers.

The developer will be responsible for

- Development, testing, deployment, and maintenance of applications using the technologies referenced above.
- Helping other team members as and when needed.
- Understanding the project processes and using them efficiently as directed by his/her supervisor(s).
- Any other project tasks as required.
- Participating actively in all team activities.

Intelligent Information Systems (IIS) is a 17-year-old enterprise application systems provider headquartered in Research Triangle Park, North Carolina. We deliver bottom-line business results to our customers through the design, implementation, and support of functionally rich and technically advanced enterprise application systems using the latest software technologies from Oracle, Microsoft, and IBM. Please send resumes to HR3@iisfirst.com.
